Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-7 are rejected under 35 U.S.C. 102(b) as being anticipated by JP 08-044062.

JP 08-044062 discloses radiation sensitive resin composition containing a polyisoimide having a main structural units I and/or II (R^1 , R^3 = divalent group having divalent alicyclic group or organosiloxane skeleton; R^2 , R^4 = tetravalent organic group) and a compound that shows acid upon radiation irradiation. The compositions provide high-contrast patterned films with good thermal resistance and electrical and mechanical properties able to be used as insulating materials. Thus, a radiation sensitive resin composition comprised of a polyisoimide prepared by reaction of a polyamic acid from daiminodicyclohexylmethane and 3,3',4,4'-benzophenone tetracarboxylic dianhydride with Ac20 and 2,3,4-trihydroxybenzophenone 1,2-naphthoquinonediazido-5-sulfonate which anticipates
